

ToooAir

ToooAir Push-to-Talk over Cellular (PTToC) is a technology offering VoIP Two-Way radio communication over a Wide Area utilising the cellular data networks.

ToooAir is simply an Australia wide, One-to-One or One-to-Many two-way radio communication system utilising the cellular mobile phone network. Due to the use of cellular multi-site technology, in-building coverage is superior to most conventional LMR/PMR radio networks and offers in-tunnel and enhanced basement communication.

The ToooAir platform is fully featured including Call Hierarchy, SOS, Text Messaging, GPS Map location, Geofencing, Lone worker timer, Platform voice recording and playback, Tracklog recording and Stun device are all standard features included with the ToooAir dispatch platform. There are also no limits to "Talk Time" or the "Coverage area" within Australia with all transmissions encrypted and secure.

ToooAir

RG360

At just 118mm tall and less than 200g the RG360 fits neatly in the palm of your hand and offers a comfortable ergonomic ruggedized phone and PTT radio specified to MIL-spec-810G and ingress protection to the IP68 Standard. The RG360 offers extensive connectivity via 3G/4G and 4GX, Wi-Fi, Bluetooth and NFC with GPS.

TC500

High end compact body worn camera capable of both Push-To-Talk over Cellular connectivity and Live Video Streaming. Designed for extreme situational environments, the TC-500 body worn camera comes equipped with a large list of safety features and functionality. Once attached to the body, the device offers a strong “Big Brother” presence for operators in the field.

RG530

With a powerful Octa-Core CPU for fast application performance, large side PTT button, 4.5” outdoor readable display and 13 pin accessory interface for covert or speaker microphones, the RG530 combines everyday smartphone and Two-Way radio technology in the one device.

KWSA80K

Industry tested MIL-STD 810G, Water proof IP69 and iSafe rating ensures the smartphone can be operated in gaseous and chemically hazardous environments and harsh or wet locations, while still maintaining a large 5.0” HD display.

RG725

The RG-725 is not just a ruggedized smartphone. An impressive list of mechanical and electrical features incorporating a large side PTT button, stubby antenna, rotary “channel” selector control and accessory interface for covert or speaker microphones this unit sets this product as a benchmark for PTTToC operations.

ToooAir

Base Station Dispatcher

The user interface of the ToooAir-PTT graphic dispatch software enables quick and easy access and visibility to all users in your fleet.

Whilst radio fleets can operate as individuals and groups without the need of the console dispatch software, the ToooAir dispatch software solution greatly enhances the versatility and features available. The user-friendly displays quick visual indication of who is "On-Air", what group they belong to and where they are. Communication to the Fleet, Sub Group or a private call to an individual user is just a simple press of the space bar or mouse. Temporary groups can also be selected and communicated without the need to re-program the radio.

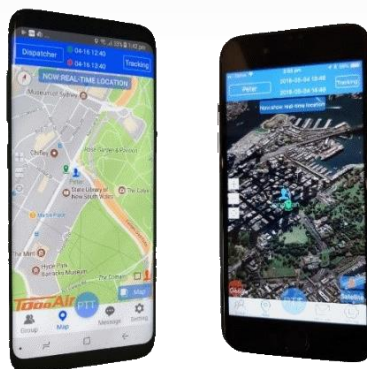

The ToooAir PC base Dispatch software features

- Change Group
- Monitor Group
- Individual Call/Private Call
- Friends List
- Force user to join group
- Dynamic re-grouping
- Call Hierarchy
- Map Page
- Voice and track log recording
- View Individual user Track logs
- Playback audio recordings
- Video Streaming
- Playback Video recordings
- Text Messaging
- Lone Worker
- Zoom to user transmission
- Zoom to SOS alarm
- Geo-Fencing alarm
- Radio Stun

ToooAirPTT

The ToooAir system can also be accessed by the ToooAirPTT app designed for both iOS or Android Smartphones that enables seamlessly communication onto the ToooAir platform allowing full voice connect to all users in the fleet. The software not only offers PTT voice communication but full mapping integration so fleet users can have quick and easy visibility of all other users across the fleet. The ToooAirPTT app is available on both the Apple store and Google Play store.
