

ToooAir

PRODUCT RANGE

TA-300 Compact fixed mount unit

The TA-300 is a fixed mount compact mobile designed to fit under-dash, in dash or adaptable to overhead console mounting with its reversible LCD display. Power sense auto switch-on ensures the user never forgets to activate the radio when starting the vehicle.

TA-388 Medium handheld

The TA-388 handheld packs a big punch for a small radio. A large 5200mAh battery offers extended operational time well over 2 days. Programmable function keys, colour TFT display and easy menu driven functionality make this unit a breeze to operate. The TA-388 also offers SOS emergency call and USB charging.

TA-680 Dual band PTTc & UHF CB

TA-680 is the handheld Australia has been waiting for, unique in its feature offering. Dual Band PTTc Push-to-Talk over Cellular (PoC) IP radio with 39 programmable commercial UHF channels including 80 x UHF CB.

TA-990 Robust fixed mount unit

The TA-990 sets a new benchmark for PTTc fixed mount mobiles. All the features required for the heavy transport, agriculture, mining, construction and service industries have been incorporated into the TA-990 including GPS, SOS, Dual Sim and 4G LTE/GPS Antennas.

TA-308 Compact handheld

The TA-308 is a compact unit weighing just 225 grams. Features include a large backlit LCD display indicating Calling party, Group, Signal strength, Battery level and GPS acquisition. Two quick select buttons for Individual call and Group call make the TA-308 extremely user friendly.

TE-590 Android PTT device

Sturdy but sleek, enhanced for PTT Two Way communication. The TE-590 incorporates the intelligence of an Android Device with rugged protection conforming to IP68 and MIL810G standards. Offering mobile dispatching of fleet via the ToooAirPTT app.

TA-682 Durable handheld

The TA-682 is a robust sturdy handheld that comes equipped with a list of new features user-friendly GUI, additional programmable keys, M5 pin connector, adjustable sound quality, voice recordings, group monitoring.

RG-725 Ruggedized smartphone

The RG-725 is not just a ruggedized smartphone. An impressive list of mechanical and electrical features incorporating a large side PTT button, stubby antenna, rotary "channel" selector control and accessory interface for covert or speaker microphones this unit sets this product as a benchmark for PTTc operations.

ToooAir is an Australian based company specializing in Push-to-Talk over Cellular technology with the most comprehensive product range, bringing the best PTTc services to Australia

Australia's best national coverage

Telstra 3G/4G/4GX

ToooAir Network

ToooAir offers PTToc with Australia wide coverage using the Telstra Network, talk anywhere anytime, unlimited private group channels, 256bit encrypted data, GPS tracking and audio recordings empowered and managed by the ToooAir Dispatcher with real time fleet tracking.

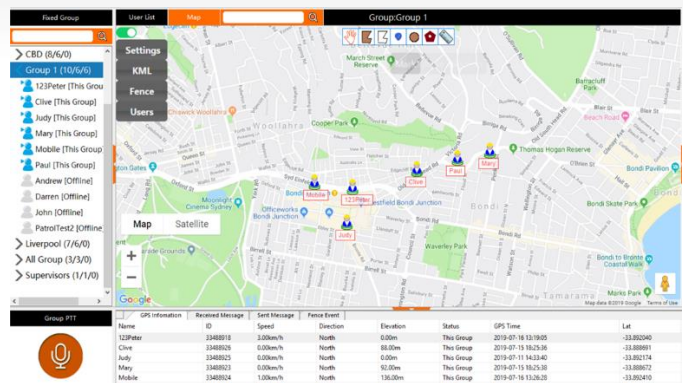

Base Station Dispatcher

The user interface of the ToooAir-PTT graphic dispatch software enables quick and easy access and visibility to all users in your fleet.

Whilst radio fleets can operate as individuals and groups without the need of the console dispatch software, the ToooAir dispatch software solution greatly enhances the versatility and features available. The user-friendly displays give quick visual indication of who is "On-Air", what group they belong to and where they are. Communication to the Fleet, Sub Group or a private call to an individual user is just a simple press of the space bar or mouse. Temporary groups can also be selected and communicated without the need to re-program the radio.

The ToooAir PC base Dispatch software drives the ToooAir platform with features like:

- Lone Worker
- Zoom to user transmission
- Zoom to SOS alarm
- Voice and track log recording
- Geo-Fencing alarm
- Radio Stun
- Dynamic re-grouping
- Individual Call
- Temporary Group
- Call Hierarchy
- Text Messaging
- Waypoint marker
- Video Streaming

ToooAirPTT is an application for iOS or Android Smartphones that enables seamlessly communication onto the ToooAir platform allowing full voice connect to all users in the fleet.

The software not only offers PTT voice communication but full mapping integration so fleet users can have quick and easy visibility of all other users across the fleet.
