Compact 5 Watt 80 Channel UHF CB

5-watt 80 channel UHF CB

Hidden display

1500mAh Li-ion battery

Rotary channel selector

K1 speaker microphone connector

Drop-in charger and plug pack

Compact and lightweight

Loud audio output

TA-CB01

Packed with features, the TA-CB01 80 channel UHF CB is a powerhouse amongst its peers. The compact and lightweight design belie a powerful 5-watt transmitter and a high-level dynamic audio output. Ergonomically designed, the TA-CB01 promises strong and reliable communications when you need it. A hidden display provides a level of security and lessens battery drain. A large Lithium-Ion battery means assured communications over a long duty cycle, important considerations in remote areas or accessing distant repeater channels.

Incorporating cutting edge technology, the TA-CB01 remains intuitive and simple to use. The rotary channel selector makes channel selection fast and assured and a K1 connector allows additional human interfaces.

Features

5-Watt 80 channel UHF portable radio

The powerful 5-Watt transmitter provides wide area coverage in the CB repeater network as well as strong point-to-point communications. The TA-CB01 works with the very latest Australian 80-channel UHF CB requirements.

Duplex/Extended range

A single press duplex / extended range button allows duplex repeater operations or talk around on the repeater TX frequency.

Hidden display

A hidden display offers a level of security and lessens battery drain. When lighted, the channel and other features are displayed in large easy to read sizes for fast recognition.

Channel scan

A simple single button press allows ALL channel scan, so you will never miss other CB channel traffic.

Low battery indicator

A low battery indicator means you'll know exactly when the TA-CB01 needs to be recharged. The indicator is accurate and reliable.

1500mAh battery

A large Li-On battery means a long duty cycle. A battery of this size means assured communications when you need it most, especially in remote areas or when trying to access a distant repeater site.

Rotary channel selector and rotary volume knob

Boasting cutting edge technology, the TA-CB01 retains some very practical functionality including a rotary channel change knob. This means fast and assured channel selection. The volume knob also allows quick and easy volume settings

K1 speaker microphone connector

A K1 type speaker / microphone connector allows for connection of additional speaker microphone or other audio type interfaces. The input is dual jack sockets.

Loud audio output

The TA-CB01 offers high volume full dynamic range audio output. It is designed to deliver loud audio in noisy environments like a truck, or outdoors in industrial type settings.
